

## BOOTH SEATING

Hospitality seating that can be purpose built for any situation.

High resilience foam over elastic back webbing provides back comfort.

Solid seat with 50mm core foam and 25mm foam layer that continues down front of kick space.

This photo features vertical top stitching on seat backs.

### OPTIONS

Overall height, length and seat depth can be specified and built to order.

Outside backs can be fully finished with fabric or covered with marox if units are being installed back to back or against a wall.
